

# DVS® EC Automatic Ventilation System

The perfect choice for rental properties or where cost is a key factor

## What is it & what does it do?

The DVS® EC Automatic System also uses 'positive pressure' to push out the stale, moisture-laden air in your home, replacing it with drier, fresher, filtered air from the roof space or from outside the building. It is designed to control condensation and improve air quality.

This is an economical choice for rental properties or where cost is a key concern. Simplicity is the key with the DVS® EC Automatic System, however you still enjoy the benefits of DVS® advanced EC technology.

## How does it work?

A quality German-made energy-efficient fan quietly takes the drier, fresher air from your roof space or from outside the building and draws it through a high efficiency air filter, tested to International standards.

The fresher, filtered air is then gently pushed into your home through ceiling diffusers. The incoming air is directed along the ceilings where it mixes with warmer air and spreads evenly through the home.

Put simply, it creates a positive pressure inside your home that 'pushes out' the stale, unhealthy air.

## DVS® EC Automatic Controller

Your system will be configured for you, and the airflow and settings will be individually calibrated to the size of your home and run automatically.

## Features available in all genuine DVS® systems

### Patented ceiling diffusers:

Patented DVS® vents enable air to be directed in up to eight different directions - so the air will always go exactly where you need it.

### Energy-efficient fan: DVS®

home ventilation systems feature an electronically commutated (EC) energy-efficient fan motor which consumes as little as 10% of the electricity of an AC fan system. Significant savings can be made by choosing DVS®.

**DVS® filters:** The DVS® range of affordable air filters are tested to International standards. They are a high quality, high efficiency filter range and ensure a cleaner, fresher air supply and a healthier home environment.

**Control system:** DVS® control systems have been designed for New Zealand conditions.
